I am an XM Satellite Radio subscriber. I am writing to urge you to reject NAB's petition 04-160 and support XM's right to provide programming such as instant traffic and weather in addition to its music and other entertainment channels. XM provides a very high quality service. Traditional AM and FM broadcasters do not satisfy all my desires for entertainment and information on the radio. I am willing to pay for the premium service offered by XM. For that price, I expect that XM should not be limited in what it can provide. My cable TV provider offers local traffic and weather that is in competition with the local TV channels. It's a part of the package I pay a monthly price for. Why should radio be any different? Why is it right to limit choices for the consumer and to restrain competition?
